DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by *Gershteyn et al* (US 6,348,694 B1).

Regarding claim 1, *Gershteyn* discloses an in vitro method of determining the protection efficacy of a substance (26) against a cutaneous photobiological phenomenon caused by exposure to solar radiation (100) (col. 5, lines 14-20), the photobiological phenomenon (24) having an action spectrum $S(\lambda)$, the method comprising determining a dynamic absorption spectrum $DO(\lambda, t)$ representing the variation in absorption spectrum of the substance as a function of duration of exposure to a source of radiation emitting in the ultraviolet (36) (col. 4, lines 8-20, lines 35-42, col. 5, lines 14-20 and col. 6, lines 3-22), and calculating the protection efficacy of the substance (sunscreen) against the photobiological phenomenon on the basis of the dynamic absorption spectrum (See Generally Fig. 7 and col. 6, lines 15-46).
